of Biological Material	9.	

Application/Control Number: 10/769,798

DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: "10, 12, 14, 16, 18" from FIG.4. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance:

Claims 1 & 9 are allowable over Prior Art of Record since the cited references, in particular Kim (US 6,292,450 B1), Oh (US 5,610,776) and Yamada (US 5,812752), taken alone or in combination do not teach or suggest the applicant's invention: adding parameters corresponding to the current error recovery operation and parameters corresponding to the previous error recovery operation to parameters corresponding to a subsequent error recovery operation when the performance of the current error recovery operation is better than the performance of the previous

error recovery operation, and ignoring the parameters corresponding to the current error recovery operation and adding the parameters corresponding to the previous error recovery operation to the parameters corresponding to the subsequent error recovery operation when the performance of the current error recovery operation is not better than the performance of the previous error recovery operation.

Claim 16 is allowable over Prior Art of Record since the cited references taken alone or in combination do not teach or suggest' wherein if the CSM in the previous ERP is greater than the CSM in the current ERP, adding current parameters and previous parameters to subsequent parameters, and if the CSM in the previous ERP is less than the CSM in the current ERP, ignoring the current parameters and adding previous parameters to subsequent parameters.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

- 3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
 - Kim (US 6,292,450 B1) discloses a method of automatically controlling bandwidth of waveform equalizer.
 - Oh (US 5,610,776) discloses a method of optimizing read channel of disk drive recording apparatus by using error rate.
 - Yamada (US 5,812752) discloses a method of optimizing read channel of disk drive recording apparatus by using error rate.

Art Unit: 2651

 Dounn et al. (US 5,533,031) discloses adjustable read channel equalization for error processing in a recordable media drive.

• Kim et al. (US 6,275,346 B1) discloses a technique of optimizing read/write channel

parameters.

Any inquiry concerning this communication or earlier communications from the examiner

should be directed to Dismery E Mercedes whose telephone number is 703-306-4082. The

examiner can normally be reached on Monday - Friday, from 9:00am - 4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor,

David Hudspeth can be reached on 703-305-4040. The fax phone number for the organization

where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR system,

see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system,

contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
